

## "OAIS enters the Mobile ATM market with Bank of Baroda"

OAIS has partnered Bank of Baroda in providing a technology aided mobile ATM solution as a part of Bank's quest for a viable financial inclusion model.

As per the solution a vehicle fitted with ATM, mobile telecommunication connectivity and GPS / GPRS facilities have been offered as a package to Bank

The solution is historic in more than one sense:

- This is an amalgam of the vehicle management, operations management and technology management all fused in one as a package. This creates a unique value proposition that OAIS has been mandated to initiate in Indian Transport Infrastructure Space
- OAIS with its Technology Solution and Transport Solution have been in a position to be a unique company to synergise the transport solution with technology solution, thus creating a space for rendering mission critical solutions mounted on automobiles, to distant nooks of the country "
